Benefit from Great Prices on Water Saving Upgrades

Spray Valves

~~\$68.00~~ \$28.00 each

Faucet Aerators

~~\$2.00~~ \$0.50 each

Through Oct. 1st, 2011, you can take advantage of bulk-rate prices on efficient upgrades to your pre-rinse spray valves and faucet aerators.

Sign up now with fellow Minnesotans to boost your profits by saving thousands of gallons of water and associated energy.

With a payback of 1-2 months, this is the smartest upgrade you'll ever make!

Pre-rinsing can account for half the water costs in a commercial kitchen.

Upgrade to a new spray valve that offers the same pressure and quality performance that you expect from your current spray valve, but uses 57% less water.

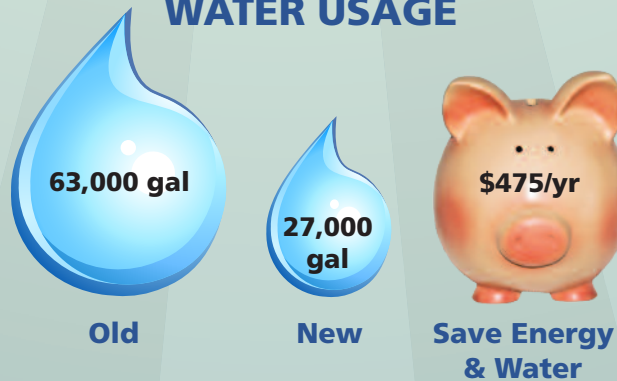

A clean kitchen has busy hand-washing stations that require a lot of hot water.

Get hands clean quickly and effectively by upgrading to new, efficient faucet aerators, and save over 75% on water, sewer, and energy costs! And installation could not be easier.

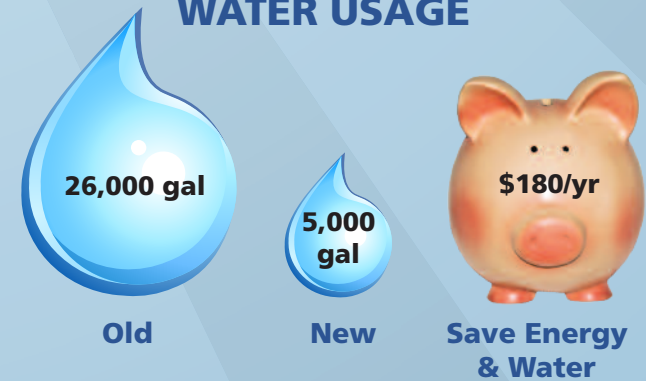

WATER USAGE

Save 35,000 gallons and over \$400 per year for each spray valve replaced!

Assumptions - Base flow: 3.0 gallons per minute (industry average), Program model: 1.28 gallons per minute; 350 days used/year, 1 hour use/day; Cost references: City of Minneapolis and CenterPoint Energy. Actual savings depend on usage.

WATER USAGE

Save 21,000 gallons and \$180 per year for each aerator replaced!

Assumptions - Base flow: 2.5 gallons per minute (industry average), Program model: 0.5 gallons per minute; 350 days used/year, .5 hour use per day; Cost references: City of Minneapolis and CenterPoint Energy. Actual savings depend on usage.

“ I saw a big difference in the water amount that was used with my old spray valve and realized that I don't need a lot of water. I need good water pressure. The new spray valve has great pressure and gets the job done!

Oscar Reyes, Las Mojarras Restaurant
