# Grow Clean Energy with a Seed Grant!

## Funding to support your community-based efforts

The Clean Energy Resource Teams provide financial assistance through Seed Grants that catalyze projects related to energy efficiency and conservation, renewable energy, electric vehicles, and energy storage in Minnesota. Grants typically range from \$2,000 to \$5,000.

Every two years, CERTs seeks applications to support community-based clean energy projects.

### FUNDING OBJECTIVES

- 1 Encourage community-based clean energy projects
- 2 Spur projects that are highly visible and replicable
- 3 Provide a forum for community education

Proposals are **due at 4pm on October 8th, 2021**, and staff are available to help with your ideas.
