Kormeer Guriga

Ka soo qaad in guriga la iibinayo “siduu yahay.” U fiirso inuu baaro xirfadle xubin ka ah ASHI ama InterNACHI. Waxa kale oo fikrad fiican ah in la codsado biilalkii hore ee adeegga si loo qiyaaso kharashka kuleylka iyo qaboojinta guriga, maadaama biilasha badan ay tilmaami karaan in loo baahan yahay hagaajinta tamarta.

Waxaa jira afar meelood oo ku yaal guri leh fursadda ugu sareysa ee keydinta tamarta cimilada gobolka Minnesota — sida ay u kala mudan yihiin xagga hoose - ee ay tahay inaad kormeerto ka hor intaadan iibsan.

- 1 Dahaarka Hawada:** Bixidda hawo ka timaadda guriga gudihisa waxay horseedeysa inay soo gasho saqafka taasoo kusababi karta arrimo jawiga caadiga ah, biyo xireenno baraf ah, iyo arrimaha qoyaanka. Daboolida meelaha siideenaya iyo ku darida dahaarka waxay hagaajineysaa adkeysiga guriga iyo keydinta tamarta. Qiimaha -R lagu taliyay: R - 50.
- 2 Nidaamka kuleylka:** Foornooyinka hawada lacadaadiyey ee caadi ahaan waxay jiri karaan 20 sano, kulelyiyeashu waa in la beddelaa 25 sano kadib Si loo kordhiyo keydinta tamarta, foornada waa in lagu beddelaa moodal leh waxqabad (AFUE) oo ugu yaraan ah 96% iyo koronto ku shaqeysa (ECM), iyo kuleeliyaha waa in loo casriyeeyaa qaab isu-ururin leh ugu yaraan 90% AFUE .
- 3 Dahaarka Darbiga:** Darbiyada leh dahaadh yar waa qabow iyo duleel. Darbiyada xirmooyinka cufan leh dahaadhku waxay yareeyaan duleelada guriga waxayna hagaajinayaan raaxada guriga. Tani waxay sidoo kale yareyn doontaa luminta tamarta waxayna keydineysaa lacag. Qiimaha-R lagu Taliyay: R - 11.
- 4 Daaqadaha:** Daaqadaha waa iney noqdaa labo-labo, ama hal-muraayad oo leh daaqadaha duufaanta. Dariishadaha duufaanka waxaa lagu dhejin karaa bannaanka daaqadaha hal-muraayad ah si lagu gareeyo kharash wax ku ool ah ee isticmaalka tamarta, loo yareeyo duleelada, loona hagaajiyo raaxada.

Wixii macluumaaad dheeraad ah ee ku saabsan sameynta hagaajinta tamarta keydinta, la tasho Hagaha Tamarta Guriga ee Waaxda Ganacsiga ee Minnesota (<https://mn.gov/commerce/energy/conserving-energy/home-energy-guide/>) iyo Hoyga Tamarta Guriga ee Xarunta Tamarta iyo Deegaanka (<https://homeenergyhub.org>).

Maxaa ku jira Biilkaaga Adeega?

Biilashaada korantada iyo gaaska dabiiciga waxay leeyihii dhower nooc oo lacag ah. Kharashyada dhabta ah ee tamarta iyo walxaha biilasha way ka duwanaan karaan iyadoo ay kuxirantahay adeeggaada, laakiin waa kuwan aasaasiga.

Kharashka Adeegga

Khidmadda adeeggu waa khidmad bille ah oo aad bil kasta bixiso si aad tamarta ugu hesho. Xitaa haddii aadan isticmaalin wax tamar ah bil gudaheed, weli waxaa lagaa qaadi doonaa lacag si aad uheshid adeegga.

Kharashka Tamarta

Kharashka tamarta ee biilkaaga waa kharashka korantada ama gaaska aad isticmaashay. Waxaa lagu soo dalacayaan kiilowaat-saacaddii (kWh) koronto iyo kuleyliyaha gaaska dabiiciga ah. Adeeggaagu wuxuu akhriyaa mitirkaaga si loo go'aamiyo qadarka korantada ama gaaska dabiiciga ah ee la isticmaalay. Wuxuu yareyneysaa kharashka tamartaada adoo adeegsanaya tamar yar!

- 1 Fahamka kilowatts (kW) iyo kilowatt-hours (kWh):** kilowatts waa xaddiga isticmaalka tamarta; kiilowaat-saacaddii waa tiro tamar ah oo la isticmaalo. Tusaale ahaan, microwave waxaa laga yaabaa inuu isticmaalo koronto qiyaas ah 1 kilowatt (kW). Haddii microwave-kaas la isticmaalo 2 saacadood, wuxuu isticmaali doonaa 2 kilowatt-saacaddood (kWh) oo koronto ah.
- 2 Fahamka therms:** therms waa halbeeg ga kuleylka. Hal therm ayaa u dhigma ku dhowaad 29 kWh waxaana lagu bixin karaa qiyaastii 97 fuudh oo saddexjibaa ah oo gaaska dabiiciga ah.

Wadayaasha

Adeegyo badan ayaa sidoo kale kudara "wadayaal" biilkaaga. Wadayaasha waa lacag laga qaado dhinacyo gaar ah oo ka mid ah adeeggaaga tamarta, sida qiimaha shidaalka. Wadayaasha waxaa laga yaabaa inay ku saleysan yihiin inta tamarta aad isticmaasho ama waxay noqon karaan khidmad go'an oo bil kasta ah.

Canshuuraha

Ugu dambeyn, canshuuraha biilkaaga ayaa ku kala duwan hadba halka aad ku nooshahay. Canshuuraha waxay noqon karaan khidmad fidsan ama is bedbeddela.

Immisa ayuu yahay Biilkaaga Adeeggu?

Celcelis ahaan qoyska reer Minnesota oo ka kooban afar qof ayaa isticmaala qiyaastii 800 kWh oo koronto bil kasta waxayna bixiyaan qiyaastii \$ 100. Biilasha gaaska dabiiciga way kala duwan yihiin laakiin caadi ahaan waa \$ 100- \$ 200 bishii.

Haddii aad bixineyo wax badan intaas, waxaad awoodi kartaa inaad hesho dariiqooyin aad ku yareyn kartid tamarta oo lacag ku keydsato. Wuxuu khalad ku jiro biilkaaga.
