Clean Energy Solutions

Minnesota Project Overview

- ✓ SolarWind hybrid electrical energy generation facility with a maximum output capacity of 4.90 megawatts
- ✓ Consist of two GE 1.7 MW wind turbines, and 1.5 MW of Solar Photovoltaic panels
- ✓ Utilize the same point of interconnect for the wind and solar.
- ✓ Located near host community..
- ✓ Juhl performs all of the development work required to bring the project to completion.
- ✓ Estimated online date end of 2015 – mid 2016
